

## **Dr Simon Fox QC - Inquests, Public Inquiries & Coronial Law**

### **Practice**

Simon is a medically qualified specialist clinical negligence silk who has been representing clients at Inquests for over 20 years.

Within clinical negligence, Simon specializes in cases with difficult and complicated issues on breach of duty where his medical qualification enables him to better understand the full breadth of the potential issues, get the most from the experts, present the client's case at its best and cross-examine effectively.

This specialism is particularly suited to Inquests in which medical treatment of the deceased is an issue.

He often represents families and NHS Trusts in complicated hospital deaths or cases involving concerns over medical management. He has been instructed in a number of inquests which attracted national press interest, have involved issues of neglect and Coroner's recommendations/reports to prevent future deaths.

Simon has been an Assistant Coroner since 2010. He sits in Bristol two days per month in most types of case including injury cases but in particular in hospital and mental health-related cases.

Simon was also appointed Assistant Coroner in Dorset to hear the Inquest of Richard Westgate in 2017 (British Airways pilot alleged to have died from an aerotoxic syndrome due to in-flight exposure to organophosphates).

His practice is nationwide. He spends much of his time travelling the country to meet clients in Chambers (London, Birmingham, Bristol, Manchester, Liverpool and Leeds), solicitor's offices and in client's own homes.

### **Background**

Simon qualified first as a doctor at Charing Cross and Westminster Medical School and worked in the UK, New Zealand and Central Africa from 1989 to 1994. His experience included emergency medicine, terminal care, neurosurgery and treating casualties from the Mozambique civil war.

Simon lives in Cheltenham.

Outside work Simon is a keen hill runner, competing in 24-hour events up to 100 km and 4-day events up to 160 km.

## Directories

The comments below are from Chambers UK and The Legal 500:

**Band 1** Ranked by Chambers UK.

"Dr Simon Fox is superb with clients." "He is able to see points other barristers couldn't and offer a new perspective."

"He is very forensic – none of the detail ever passes him by and he is very good at dealing with traumatised clients and putting them at ease."

"The medicine is really complex and he's just completely on it, bashing forward questions with the experts and has never not understood where we are."

"He is extremely hardworking and unafraid to fight difficult cases."

"an extremely talented and experienced counsel, able to get the very best from medical experts"

"commands a nationwide reputation for the depth of his specialisation" and "absolutely fantastic ... extremely talented ... really easy to work with and clients like him"

"He's very good with complex serious injury, particularly high-value cases. He's very forensic and knows how to handle experts. A fabulous barrister who gives sound, pragmatic advice." "He communicates with experts with ease, and goes above and beyond the call of duty."

"He is absolutely fantastic. He is really easy to work with and clients like him." "He is an extremely talented barrister who provides practical support and advice."

... commands a nationwide reputation for the depth of his specialisation. Sources cite the strength of his medical knowledge and experience, which enable him to "get to grips with all of the pertinent issues in the case with unbelievable speed." In addition, solicitors praise his accessibility and "willingness to advise on the most complex matters even at short notice."

... elicited a tranche of enthusiastic feedback for his "excellent client care skills," as well as for "his strength on his feet in court."

"he has an overtly reasonable and calm approach which belies his evident ability to get his hands dirty in a fight".

"not afraid of a fight" and "one of the most delightful barristers you'll ever meet."

## Seminars

Simon also speaks at seminars across the country. Audiences have described him as "such a good presenter that I would not miss any seminar conducted by him ... possibly the best speaker we have had, and we have had some very good ones".

Present seminar topics include "Neuroanatomy for Clin Neg Lawyers" and "Clin Neg Update".
